Alpiq Challenge

Model Selection

Feature Engineering & Data Imputation

Feature Engineering

- Binary encoding common off-days
holidays + weekends
- Solar Photovoltaic
- Temperature
- Past Consumption
 C_{t-1h} , C_{t-24h} , $C_{t-30days}$, $C_{t-1year}$
- Past Fourier-transformed Consumption
 $F_{C_{t-1h}}$, $F_{C_{t-14h}}$, $F_{C_{t-30days}}$, $F_{C_{t-1year}}$

Data Imputation

- Feed-forward fill
- Backward fill
- Nearest-neighbor imputation
- Mean value imputation

Performance

- Improved roll-out predictions
